---

While vaccinations remain a personal choice, the College strongly encourages members of the community to receive the COVID-19 vaccine when it is available to them. The majority of Landmark College employees live in either VT, NH, or MA, and each state has their own guidelines.

It has been brought to our attention that NH residents are seeing swift vaccination appointments. It may be due to the NH vaccination guidelines eligibility as related to "...staff of a residential facility for persons with....developmental disabilities" – Attention-Deficit/Hyperactivity Disorder, Autism Spectrum Disorder, and Learning Disorders are covered under that definition.

New Hampshire Residents -- please use this link to schedule your vaccine -- [COVID-19 Vaccine Schedule for NH Residents | NH Vaccine Strategy](#) and [covid19-vaccine-allocation-plan-summary.pdf \(nh.gov\)](#)

VT and MA residents do not include this eligibility element, at this time. Links are below. However, for MA residents, congregate care setting examples include "Private special education schools which offer residential services and are approved by the Department of Elementary and Secondary Education". It may be worth investigating if a post-secondary school that provides residential, special education services can be considered.

- Vermont: [About COVID-19 Vaccines in Vermont | Vermont Department of Health \(healthvermont.gov\)](#) & [COVID19-Vaccine-Eligibility-Graphic\\_0.png \(3745x1605\) \(healthvermont.g](#)
- Massachusetts: [COVID-19 Vaccine | Mass.gov](#) (note the [COVID-19 vaccinations for congregate care settings | Mass.gov](#) definition. An example given is "Private special education schools which offer residential services and are approved by the Department of Elementary and Secondary Education".

Please contact me or CIRT at [publichealth@landmark.edu](mailto:publichealth@landmark.edu) with any questions and/or concerns.

Thank you.
